### **The purpose of this course**

This course will help you to get the most out of ADC, whether you design buildings or piled foundations.

### **Who is this course for?**

Structural engineers who want to use ADC to design a range of concrete elements, from circular piles to rectangular columns and from multi-span beams to solid or ribbed slabs.

### **You will learn how to**

- Design beams, slabs and columns
- Find the optimum reinforcement for multiple load cases
- Control the reinforcement options to fine tune your designs

### **Relevant Products**

- ADC AdCol
- ADC AdBeam
